- Sweat-resistant
- Skin compatibility dermatologically confirmed
- Suitable for children from 1 year of age
- Plant-based active ingredient
- Contains aloe vera to be kind on the skin
- Can also be used on the head and face

Contains citronella oil. May cause allergic reactions.

Active ingredient in Soventol[®] PROTECT Mosquito:

11 g/100 g mixture of cis- and trans-p-menthane-3,8-diol

Active ingredient in Soventol[®] PROTECT Tick:

12.5 g/100 g mixture of cis- and trans-p-menthane-3,8-diol

Soventol[®] PROTECT intensive spray repellent uses a special composition of plant-based active ingredients that target the senses of insects and parasites. This forms the basis for the efficacy of Soventol[®] PROTECT.

Soventol[®] PROTECT Mosquito Repellent:

- Up to 7 hours of protection against domestic and tropical mosquitoes (including tiger mosquitoes)
- Up to 4 hours of protection against ticks and other blood-sucking insects

Soventol® PROTECT Tick Repellent:

- Up to 6 hours of protection against ticks and other blood-sucking insects
- Up to 4 hours of protection against domestic and tropical mosquitoes (including tiger mosquitoes)

Instructions for use: Spray evenly over the body without leaving any gaps, then rub into the skin (the recommended application rate is 1 ml per 250 cm², i.e., 6-7 sprays per forearm). To apply to the face, spray directly onto the palm of the hand and apply sparingly to the face, eyes and mouth area. Also rub onto areas of skin covered by light materials, as insects can bite through these. Do not wipe off before the spray is dry. Repeat as needed; no safety interval is required between applications. Repeat application after prolonged contact with water or heavy perspiration. Use sparingly in small children. Not suitable for infants.

When using together with sunscreen, please make sure that Soventol® PROTECT intensive spray repellent is applied last.

Warnings and first aid measures:

For external use only. Use spray according to the instructions. Do not spray around the eyes and mouth. Rinse immediately with plenty of water in the event of contact with the eyes.

IF SWALLOWED: Call a POISON INFORMATION CENTRE or a doctor if you feel unwell. Rinse out the mouth and then drink plenty of water. If inhaled, get some fresh air. Consult a doctor if symptoms persist. Consult a doctor before using on damaged or inflamed skin. Keep out of reach of children. Due to lack of evidence, Soventol® PROTECT should only be used during pregnancy and breast-feeding after consulting a doctor.

Information for doctors:

Allergic reactions and sensitisation are possible.

Store at room temperature. Ensure the container is completely empty before recycling.

Use biocides with caution.

Always read the label and product information before use.
